TO: joule users and operators
FROM: Project Engineering
SUBJECT: joule v0.1.8 release - native OS GUI installers
REF: CHANGELOG.md [0.1.8], tag v0.1.8

v0.1.8 ships real native installers: Windows Setup.exe, macOS .pkg/.dmg with joule.app, and Linux .deb - not tarball-only.

Summary

Users double-click platform installers. CLI one-liners remain. Unsigned until Authenticode/Apple notarization certs exist; SmartScreen/Gatekeeper may warn.

Added

- Windows: joule-*-windows-x86_64-setup.exe (Inno Setup)
- macOS: .pkg, .dmg, joule.app.zip per arch
- Linux: .deb with desktop entry
- download.html prefers native assets

Install

- Windows: download Setup.exe from Releases
- macOS: open .pkg or drag .app from .dmg
- Linux: sudo dpkg -i joule-*-linux-*.deb
