FROM: Project Engineering
SUBJECT: joule v0.1.7 release - interactive GUI graphs and tabs
REF: CHANGELOG.md [0.1.7], tag v0.1.7

v0.1.7 ships a richer interactive GUI for normie operators: multi-series live plots with zoom/pan, Overview/Graphs/Donor/Chat tabs, and a fix so `gpu_probe` env tests stay green under parallel cargo test.

Summary

This release builds on v0.1.6 GUI shell. Primary surface remains ``joule`` / ``joule gui``. Graphs are interactive; donor policy and cluster chat are in-window. Packaging channels (GitHub Releases, Homebrew tap, f00 AUR PKGBUILD) pin 0.1.7 after CI assets land.

Added

- GUI tabs: Overview, Graphs, Donor, Chat
- Multi-series plots: backends, agents, mesh, dht, VRAM, balance, tokens, tok/s, economy window
- Zoom, pan, scroll, box-zoom, double-click reset, series toggles, linked time axes, sparklines
- Token mix bar chart; balance rate plot
- Full donor policy editor (pause, VRAM cap, local schedule, max temp, min battery)
- In-app chat against `/v1/chat/completions` with cached API key
- Poll interval slider; start/stop control and agent; force poll; clear history; reset plot views

Fixed

- `gpu_probe` env override tests serialized to avoid process-global env races under parallel cargo test

Upgrade / install

1 Linux/macOS one-liner:

```
curl -fsSL https://github.com/f00-sh/joule/releases/latest/download/install.sh | sh
```

2 Homebrew:

```
brew upgrade f00-sh/tap/joule
```

3 From source:

```
git pull && cargo install --path crates/joule --force
```

Verification

- cargo fmt --all -- --check
- cargo clippy --workspace --all-targets -- -D warnings
- cargo test --workspace
- joule version -> 0.1.7
- scripts/live-pool-smoke.sh backends_join=2 backends_pause_only=1
