FROM: Project Engineering

SUBJECT: joule v0.1.9 - product icon + Authenticode-ready Windows pipeline

REF: CHANGELOG.md [0.1.9], tag v0.1.9

v0.1.9 ships the joule product icon in Windows exe, Setup, macOS app, and Linux packages, plus an Authenticode sign path when a code-signing PFX secret is configured.

Added

- packaging/icons + winres embed into joule.exe
- AppIcon.icns for macOS .app/.pkg/.dmg
- Linux hicolor icons and Icon=joule desktop entry
- sign.ps1 + CI secrets JOULE_WINDOWS_CERT_PFX_BASE64

Signing

Without an OV/EV Authenticode certificate secret, Windows installers remain unsigned (SmartScreen may warn). Add the PFX as a GitHub Actions secret to sign on the next build.
